### Product Name:
**ALKALI SEALER**

### Product Code:
W 103

### Suggested Primer:
Not Required

### Generic Type:
Modified alkyd rubber.

### General Description:
Very good resistance to alkali attack due to residual traces of moisture in concrete and cement surfaces after the last stages of curing and drying-out.

### Recommended Uses:
For priming and sealing of concrete and cement plaster/rendering prior to applying oil-based or alkyd paints. Also useful for sealing off water leak stains on ceilings before re-applying emulsion paints.

### Features/Benefits:
- Reduced risk of discolouration
- Cured for less than 60 days
- Use as a foundation coat on concrete walls
- Reduced risk breakdown of oil/alkyd paints

### Directions for Use:
Apply 1 coat, but preferably 2 coats (to avoid pinholes) Kaleidoscope Alkali Sealer.

### Product Data:
- **Coverage (per coat):**
  - 6 - 8 sq.m. per litre
  - 65 - 85 sq.ft. per litre

- **Drying Time:**
  - Touch Dry 3 - 4 hrs
  - Over-coat 12 hrs.

- **Application:**
  - Brush, roller or spray.
  - Thin up to 10% for spraying

- **Gloss:**
  - Flat

- **Colour:**
  - White

- **Thinner/Cleaner:**
  - Brush Kaleidoscope Thinner 2000
  - Roller Kaleidoscope Thinner 2000
  - Spray Kaleidoscope Thinner 2003

- **Flash Point:**
  - 39°C (102°F)

Doc No/Rev No./Rev Date: 09/01/2011
General Surface Preparation:

Poured concrete must be allowed to cure for at least 60 days, while cement plaster/rendering should cure for 30 days. Ensure the surface is dry and cleaned free of all dust, dirt, mortar splashes and other debris. Fill any cracks, crevices, holes, etc. with proprietary masonry filler.
