Doc No/Rev No./Rev Date: 09/01/2011
**General Surface Preparation:**

**New and Unvarnished:**
Ensure surface is dry and cleaned free of all dust, dirt, oil and other debris. Fill all holes, cracks, crevices with proprietary wood filler. Rub down with abrasive paper to obtain a smooth, firm surface.

**Previously Varnished:**
Remove any loose, flaking, cracking, crazing, peeling, semi-adherent varnish, dirt, dust, oil, grease and other debris. Fill all holes, cracks, crevices etc. with a proprietary wood filler. Rub down with abrasive paper to obtain a smooth, firm surface.

**N.B:** The hardwood, TEAK, is very prone to inhibit the drying of varnishes. Repeated thorough wiping with rags soaked with Kaleidoscope® Thinner 2000 or 2003, or Turps Substitute can avoid the problem. Frequent changes of rags are beneficial. If the surface is not exposed to direct sunlight, apply 1 coat Kaleidoscope® N.C. Sanding Sealer to the bare wood as a "barrier coat" before applying Kaleidoscope® Clear General Purpose Varnish.

**Directions for Use:**

**New and Unvarnished:**

a) Full exposure to direct sunlight - Apply 1st coat Kaleidoscope® Clear General Purpose Varnish, thinned 25%

b) No exposure to direct sunlight - An alternative to (a) above, apply 1 coat Kaleidoscope® N.C. Sanding Sealer
c) Follow (a) or (b) with 2 full coats
d) Kaleidoscope® Clear General Purpose Varnish.

**Previously Varnish:**

On bare wood areas, apply 1 or 2 coats Kaleidoscope® Clear General Purpose Varnish. Then over the entire surface, apply 1 or 2 coats Kaleidoscope® Clear General Purpose Varnish.
