| Application: | Brush, roller or spray  
Thin 10% for spraying |
| Gloss: | Flat |
| Colour: | Green, Grey and Red |
| Thinner/Cleaner: | Water |
| Flash Point: | 39°C (102F) |

**Directions for Use:**
No more than one pint of water to one gallon of Floor Paint.
General Surface Preparation:

**Concrete:** Should be swept clean of dirt and loose particles. Grease should be removed by washing with a diluted soap solution, then wash the surface off thoroughly with clean water. Smooth concrete should be treated with Kaleidoscope Concrete Primer then wash off with clean water before the application of Kaleidoscope Floor Paint.

**Note:** Garage floors and carports - Acrylic Floor Paint may be used on garage floors. However, the Floor Paint may peel after a period of time at the point of contact with hot tyres. To prevent this, simply place mats where tyres track and rest.

**Wooden Floor:** Should be cleaned of any dirty or loose particles. Flaking paint, wax or old polish should be thoroughly scraped off. Floor boards should then be primed with Wood Primer. Knots and pockets of resin should be treated with Knotting Varnish.
