Product Name: RUST CONVERTER

Generic Type:
Phosphoric acid solution containing a wetting agent.

General Description:
Used to covert the surface layers of light rusting or rust residue after hand or power tool cleaning, into a non-rusting iron phosphate state.

Recommended Uses:
Very beneficial for improving corrosion resistance of iron and steel surfaces when hand or power tool cleaning is used to remove rust and millscale.

Caution:
Use only with adequate ventilation. If you experience eye watering, dizziness or headaches increase fresh air or wear an approved respirator (Follow respirator manufacturer’s direction for use) or leave the area. Avoid contact with eyes. Wash hands after use.
KEEP OUT OF THE REACH OF CHILDREN.

Product Code: Z 106

Suggested Primer:
Not Required

Product Data:
Flash Point: Non-inflammable

General Surface Preparation:
Thoroughly remove all rust and millscale by scraping and wirebrushing to a Hand Tool finish, SSPC-SP-2 or by Power Tool cleaning to SSPC-SP-3.

Applicable Information:
Apply liberally by brush. Allow to react for 30 mins., maintaining a constant wet state. Thoroughly rinse the surface with clean water, preferably with a hose. Allow to dry, then immediately follow with the application of the paint system.

Coverage: 4 - 6 sq. m. per litre. 45 - 65 sq. ft. per litre
Thinner/Cleaner: Water
