**Product Name:**
STERILIZING SOLUTION

**Product Code:**
Z 105

**Generic Type:**
A blend of selected fungicides

**Recommended Uses:**
For sterilizing algae and fungus infected surface areas prior to re-painting.

**General Description:**
A highly concentrated fungicidal solution for killing algae and fungus.

**Product Data:**
- **Coverage:** 15 - 20 sq. m. per litre
- **Coverage:** 160 - 210 sq. fl. per litre
- **Colour:** Clear
- **Flash Point:** Non-inflammable

**Directions for Use:**
Firstly, thoroughly wash the surface area with clean water using a stiff brush and hosing, if available, to remove as much of the growth as possible.

Then apply a liberal coat Kaleidoscope Sterilizing Solution by brush or rag and leave overnight.

Finally, using a stiff brush, remove all residual growth. Immediately follow with 1 coat of paint.

**Applicable Information:**
CAUTION: Remove food, drinks, children and pets from the area of use. Also do not eat, drink or smoke. Wash splashes on skin or eyes immediately. Avoid contact with growing plants and fish-ponds.

**Features/Benefits:**
Extends the life of topcoats on walls that are prone to fungus and algae.
