## Generic Type:
A special blend of vegetable drying oils.

## General Description:
The low viscosity of Teak Oil achieves good penetration of bare wood surfaces to thoroughly seal and protect the surface, while enhancing the colour and beauty of the wood grain, particularly of hardwoods.

## Recommended Uses:
For treating raw bare hard woods, using a simple process.

## Features/Benefits:
- Teak resists moisture
- mold and mildew
- repels insects

## Product Data:
- **Solids Volume:** 72%
- **No. of coats:** 1
- **Coverage (per litre):**
  - 7 - 15 sq. m.
  - 75 - 160 sq. ft.
  - depending on porosity
- **Drying Time:** Overnight
- **Colour:** Clear
- **Gloss:** Low Sheen
- **Cleaner:** Kaleidoscope Thinner 2000
- **Flash Point:** 39°C (102°F)

Doc No/Rev No./Rev Date: 09/01/2011
General Surface Preparation:

New Surfaces:
Ensure that surfaces are thoroughly dry and free from all dust, dirt, grease and grime. Using a dry soft cloth, apply Kaleidoscope Teak Oil fairly generously. Leave for 5 - 10 mins, and then wipe off any excess material with a soft cloth, using a polishing motion. Finally, with a new soft cloth rub vigorously to obtain a dry burnished finish.

Previously Oiled Surfaces:
Every 4 – 6 months repeated light application may be required.

Directions for Use:

New:
• Using a dry soft cloth, apply Kaleidoscope Teak Oil fairly generously.
• Leave for 5 - 10 mins., then wipe off any excess material with a soft cloth, using a polishing motion.
• Finally, with a new soft cloth rub vigorously to obtain a dry burnished finish.

Previously: Every 4 - 6 months, repeated light application.

Oiled: Applications may be required.
